

Arineta CT FDA Clearance

August 10, 2016. Arineta Ltd. is glad to announce it has received FDA 510(k) clearance for commercial distribution of the SpotLight CT scanner in the USA.

The SpotLight CT is a high performance, cardiovascular-dedicated CT which provides a complete cardiac imaging solution at a lower cost and higher performance than conventional whole-body CT equipment. The proprietary product's design is radically different from the design of the general purpose multi-slice CT scanners. The Arineta product was designed by imaging experts in close cooperation with cardiologists for cardiologists.

With the Arineta cardiac dedicated CT, Cardiac CT will become an essential part of the diagnostics and treatment plan for every cardiac patient. The images below, acquired on the Arineta scanner, depict the type and quality of information provided to the cardiologist.

With the FDA clearance, Arineta is now working together with its distribution partner to commence commercial shipments to the USA.
